

CHEMICAL DISPENSE CABINET

Model # LPP130.FR4

2 Cabinets in Stock

The Chemical Dispense Cabinet transfers Bulk Chemicals to multiple tools via customer supplied signals. The Cabinet is constructed of 1/2" FM 4910 approved, white PVC-C and measures 35" W x 36" D x 79" H. It has a sloped, sump area with drain and a nitrogen purged, control enclosure with tool secured access panels. Updraft exhaust helps maintain a fume controlled enclosure.

The Cabinet dispenses chemicals from an onboard 55-gallon Drum source, through a 10 gal. molded, polypropylene chemical reservoir using a teflon, air-driven, double diaphragm pump. Drum is monitored for level and is fed through an Entegris Dispense Head located inside the unit (Dispense Head & mating Dip Tube are not included).

A manual DI Water Washdown Valve and DI Water Spray Gun are included.

SOLD AS IS with MINIMAL RETOOLING or REFURBISHED to your Specifications
