

CHEMICAL DISPENSE CABINET

Model # LPP130.FR4.double

5 Cabinets in Stock

3 Cabinets measuring
69.5"W x 36"D x 79"H

2 Cabinets measuring
69.5"W x 46"D x 79"H

The Auto Source Switching Chemical Dispensing Cabinet transfers Bulk Chemicals to multiple tools via customer supplied signals. The Cabinet is constructed of 1/2" FM 4910 approved, white PVC-C. It has two separate sloped, sump areas with drains and a nitrogen purged, control enclosure with tool secured access panels. Updraft exhaust helps maintain a fume controlled enclosure.

The Cabinet dispenses chemicals from two onboard 55-gallon Drum sources using a teflon, air-driven, double diaphragm pump. Drums are monitored for level and are fed through an Entegris Dispense Head located inside the unit (Dispense Head & mating Dip Tube are not included). Two manual DI Water Washdown Valves and DI Water Spray Guns are included.

SOLD AS IS with MINIMAL RETOOLING or REFURBISHED to your Specifications
